

A decorative border surrounds the central text. It features a red circle on the left edge, a black circle on the top edge, and a pink circle on the bottom edge. Small geometric shapes, including diamonds and circles, are placed at the corners. Curved arrows are positioned at the top-left, top-right, and bottom-left corners, pointing inwards towards the center.

Team B

Problem statement

How might we enhance 42 Asia Campuses?

- Each has a unique campus life with its own distinct tools and resources
- Create a unified impact that benefits the entire 42 Asia community

What is special about 42?

Peer-to-peer learning!

Fear to make peer

When we want to ask something, we might think:

- Can this person actually teach me?
- Is this person busy?
- Is this person question-friendly?

Why 42 should use AMA

- Most programmers are usually introverted people.
- We actually learn more by teaching. (Feynman Technique)

How can we scale up?

- The AMA feature can be applied to all campuses locally and once the system is established, can be easily connected globally.

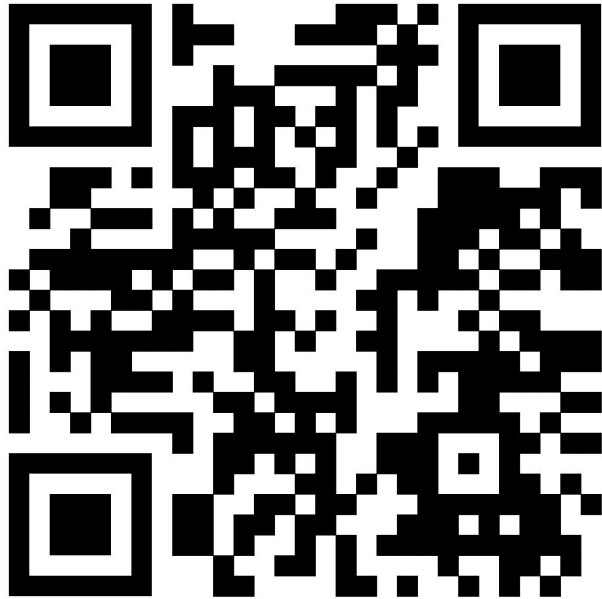

For the good life

Thanks!
